

StatsPerform

Cycling Widget

1. - INTRODUCTION

El Cycling widget is a set of files hosted in the customer web site that can show grouped in tabs or alone information a cycling race (classifications, narration, teams, riders, etc)

It is a set of files, java, css and XML, and needs to be feed with information coming in XML files and sent by Opta to the Customer web site

2. - WIDGET FILES

2.1- XML Files

The widget will use the following XML feed files that have to be in the customer web server and that will be updated by Opta when needed, basically when the information included in them change.

File	Description
CNC_ccccc	Fixtures
CGF_ccccc	Generic classifications (last stage)
CSF_ccccc_jj	classifications of every stage
CMP_ccccc	Team and riders' info.
POx_ccccc_jj.Xml	Information Alive. x = language code

'cccc' id the competition id provided by StatsPerform, 'jj' is the stage number.

2.2- LANGUAGE Files

File	Description
GS_IDIOMAS_CICLISMO_i	File that contains all words and phrases used by the widget in a language

'i' is the the language ID.

Id	Language
0	Spanish
1	English
3	Italian
4	French

2.3 - JAVASCRIPT and CSS Files

Files
opta-widgets-ciclismo.css
jquery-1.10.2.min.js
opta-widgets-ciclismo.js

2.4.- Available Widgets

opta-ntemporadas-pagina	En el widget opta-ciclismo-his-pal , numbers of years shown in a block	If this parameter does not exist it shows all years(seasons) include in the file

3.- Installation and configuration

3.1.- The installation kit includes example pages as help in the installation and configuration process. The user can copy the specific code he has to insert in his web page. This code is included in the tag "div" with the id "**opta-widgets-races-contenedor**"

3.2.- Copy the files in your web server, normally the files are in a zip file provided by Opta.

3.3.- Check that the files mentioned in the point 2.1 are in the web server in the URL specified in the parameter **opta-PathXml**.

If not, please contacts with dl-agencia@statsperform.com asking these files. They wil configure the necessary things to update these files in you web server,

In the example page **opta-PathXml** has the value= 'widgets-opta-ciclismo/xml/'
Please set the appropriate value to you site.

3.4.- The parameter **opta-idcompe** must be changed to provide the correct competition ID.

4.- Web page Example

```
