Xml standings description

1.- GENERAL DESCRIPTION

The standings xml files contain the standings of a competition for a specific round-day

The way to name these files follow the rule:

Normal name: **CSF_ccccc_dd.Xml**

Generic name: **CGF_ccccc.Xml**

CSF is a fix prefix that identifies the file as a standing file.

ccccc is the competition code in 5 digits.

dd is the Day/Round corresponding to the standing. If the competition is league **dd** is the day. If the competition is by rounds **dd** is the round.

CGF is a prefix that identifies the file as a generic standing file. The generic files are very useful in leagues because they always have the standing of the last day

Example:

CSF_00522_10 Xml standings of the first round of the World cup 2010

CFG_00400.Xml standing generic file of the Spanish league.

NOTE: *Opta España can add new attributes sections in this model without communicating previously to the users. Anyway the current content will be maintained.*
