

Opta España

Stats Feed

Xml stats description

1.- GENERAL DESCRIPTION

The stats xml files contain a group of stats of o competition.

The way to name these files follow the rule:

DCF_ccccc_tt_xxxx.Xml

DCF is a fix prefix that identifies the file as a ranking file.

ccccc is the competition code in 5 digits.

tt identifies the type of stats included (teams, players,...)

xxxx is a number that identifies the groups of variables included in the file, this number is always the same for a customer.

Example:

DCF_00522_01_0180.Xml team rankings of the World cup 2010

DCF_00522_02_0179.Xml player ranking of the World cup 2010

NOTE: *Opta España can add new attributes sections in this model without communicating previously to the users. Anyway the current content will be maintained.*

2.- DESCRIPTION

2.1 Header

```
<?xml version="1.0" encoding="UTF-8" standalone="yes"?>  
<Calendario>
```
